Location - Pune

Career Objective

Computer Engineering graduate with 6 months of professional experience in software development and hands-on experience building web applications using the MERN stack. Seeking an Analyst role at Deloitte where I can apply my technical knowledge, analytical thinking, and problem-solving skills while contributing to impactful projects and continuously learning in a collaborative environment.

EDUCATION

Dec 2021 - Jun 2024

B.Tech in Computer Engineering

Vishwakarma Institute of Technology, Pune

CGPA - 8.07 / 10.0

Diploma in Computer Engineering

Mar 2018 - Dec 2021

Marathawada Mitramandal Polytechnic, Thergaon, Pune

Percentage - 87.54

PROJECTS

Face Mask Detection System

A real-time system that detects whether individuals in an image frame are wearing a mask. If no mask is detected, it captures a screenshot and triggers a beep alert. The system uses deep learning for accurate face and mask detection, ideal for ensuring mask compliance in public spaces.

Smart Parking System using IOT

Smart Parking uses sensors like IR sensors and ANPR algorithm to monitor real-time space availability, transmitting data to a central control unit and the system provides users with live updates on open spaces via a mobile app or web interface. This solution enhances parking efficiency, reduces traffic congestion, and improves user convenience by offering automated and smart parking management in urban areas.

Age Gender Emotion Detection System

A real-time system that detects a person's age, gender, and emotional state from a video frame. Utilizing deep learning models, the system accurately classifies age groups, identifies gender, and recognizes emotions such as happiness, sadness, or anger. This application is ideal for enhancing user experiences in interactive systems, market analysis, or public sentiment monitoring.
